

7. COMMUNITY VALUES & GOALS

Street bulb-outs

Alley

Streetscape

S T R E E T S & A L L E Y S

- Northside's new street 'grid' will integrate with adjacent neighborhood streets.
- Create safe streets that minimize the influence of the vehicle and encourage pedestrian activity on sidewalks and greenways. Slow traffic by using traffic calming devices including narrowed streets, parking along the street, and pedestrian-friendly bulbs at intersections.
- Design lighting adequately to promote secure and safe streets throughout the community.
- Design for bus and emergency vehicle access.
- Provide adequate resident and visitor parking.
- Design alleys to keep speeds slow.
- Accommodate trash and recycling in alleys in a clean and efficient manner.
- Place site utilities underground.
